

Increased productivity for banner and sign printing

PrintFactory™

Introducing PrintFactory, a production suite for banner and sign printing that is set to revolutionize the way you run your print shop.

Get the most out of your equipment

Driving over 400 devices with PrintFactory jobs can be printed as they are being processed to increase turnaround time. For files needing manual intervention, the PrintFactory Editor allows you to produce more by separating file preparation power from RIP and print power optimizing your production power.

Save money, Reduce Waste!

PrintFactory provides all the professional-level file correction and job preparation tools you need to produce more color-accurate output with a minimum of waste and guaranteed superb results.

Accurate color on different machines, at different times

The PrintFactory Calibrator makes profile creation a breeze allowing for easy alignment of different printers or media. You'll provide your customers with color consistency throughout their entire campaign.

Printfactory Benefits

Increase productivity through automation and increased flexibility

- Unified platform increases operator flexibility.
- Driving all printers from the same platform maximizes operator flexibility.
- Produce more through advanced automation in combination with Enfocus Switch.

Significantly Reduce Waste

- Offers better control over ink deposit.
- Significantly reduces media and ink waste through efficiency and less errors.

Offers output consistency & predictability

- Achieve color consistency on different machines.
- Introduction of proofing allows for more predictable output.
- Templates and automation reduces potential risk for human errors.

Printfactory Key Features

General

- Drives more than 400 devices.
- Identical functionality on Mac® OS and Windows.®

Job Preparation

- Dedicated Editor offers a host of image manipulation, production tools and soft proofing.
- Make last minute text, color and object corrections with the built-in Editor.
- Provides user-friendly tiling setup and eyelet placement.

Quality

- Substrate simulation allows for increased accuracy in color matching.

Automation

- Use of standard and customized templates.
- Save job templates for higher productivity.
- Add cutting marks for quick and accurate finishing.
- Can be integrated with Enfocus Switch for advanced automation options.

Options

Production Editor

For professional, wide-format printing and sign making, the Production Editor option offers a wide range of editing, drawing and production tools such as rings and eyelets placement, white spacing in overlaps, template creation for repetitive jobs.

Advanced Color

For users with a large number of printers and media the Advanced Color option enables easily custom color profile creation.

Certify!

The Certify! option allows to control the quality of the printing machines and to verify if the output is printed according to your companies or your customer's standard.

RasterCreator

Turn your digital printer into an affordable image-setter with the PrintFactory RasterCreator option, ideally suited to producing films for silkscreen printing.

Cut!

This option will add fully-fledged cutting capability to PrintFactory, providing all the right plotter drivers and cutting marks.

System requirements

Mac OS® 10.4.11 - 10.5.x

Processor: 1 2.8GHz Quad-Core Intel® Xeon
5400 12MB L2 cache
Geheugen: 8Gb
Harde Schijf: SATA 320Gb (7200 RPM)
Optische drive: SATA 16x dvd-rom
Netwerkitinterface: Geïntegreerd Gigabit LAN
I/O poort: USB 2.00

Windows® XP Professional SP2 or Vista

Processor: 1 quad-core Intel® Xeon® 5300 serie
processoren 2,33 GHz, 8
MB L2 cache
Geheugen: 8Gb
Harde schijf: SATA 160Gb (10000 RPM)
Optische drive: SATA 16x dvd-rom
Netwerkitinterface: Geïntegreerd Gigabit LAN
I/O poort: USB 2.0
